A brand of:

CENTRUFFICIO LORETO S.P.A.

HEADQUARTER:

20093 COLOGNO MONZESE (MI) - VIA DORIA, 19 - TEL. +3902.253771 - FAX +3902.2542100
REGISTERED OFFICE: 20124 MILANO - ITALY - VIALE ANDREA DORIA, 17

SHARE CAPITAL € 14.058.000 - MILAN CHAMBER OF COMMERCE: N. 08312370151 dated 19.2.96
VAT IT00902270966 - CODICE FISCALE 08312370151 - REA 1215041 dated 20.5.86

COMPANY

CufMilano is a brand of Centrufficio Loreto s.p.a., born in Milan in 1986 is specialized in manufacturing and distributing office furniture, chairs and demountable partitions.

We are proud to show our numbers after 30 years of experience in the field:

- 20 showroom;
- Five warehouses with ready in stock items for quick delivery;
- Three production sites.

Actually, our Company turnover is approx of 33 millions € with around 155 employees.

OUR MISSION IS:

- Client satisfaction.
Our clients are the biggest value in the company, we continuously work for make them happy and comfortable.
- High Quality items and customer service.
We combine high quality and made in Italy standards at affordable prices.
- Our Team.
Our employees are our wealth, the daily commitment of our people is what makes the success of our company.

PROFILE

OUR STRENGTHS ARE:

Ready in stock products for immediate delivery.

We keep most of the items (Executive, Operative and demountable partitions) in standard finishes ready in stock.

Custom made products.

We have a special carpentry department, that realize special items, based on project.

100% MADE IN ITALY products;

Design and technical assistance.

We have a team composed of specialized Architects, who make some project proposals, using rendering, 3D and brochure.

Turnkey.

We can supply all the items connected to office renovation: drywalls, lightings, floors, suspended ceilings.

Straight from the factory

All the items are certified with European stability, safety, chemicals laws, so that their quality is guaranteed.

The company is also certified for quality, environmental and workers-safety standards.

Set of products: we have about 50.000 different items.

OUR CLIENTS

EXECUTIVES

BRERA

BRERA

Brera collection tops are realized in **melamine, thickness 38 mm.** with ABS 20/10 edge, tinted in the same color of the surface, and equipped with a **aluminum cable gland**, which dimensions are 290 x 90 mm.

The frame is realized with melamine legs too; the legs are assembled to the desk top by means of appropriate fastening systems and metal stiffening brackets.

Brera collection desks can be realized as simple desk, or with **lateral returns used as a side leg**. These elements are supplied with a white metal filing pedestal and cabinet.

Brera bookcases are produced in two different way: like the **classic cabinets**, with wooden or glass doors, in three different heights (low, medium and high), or as a **bookcase without doors**, with back, sides and shelves realized in the same desk colours.

BBRERA

BBRERA

BBRERA

BBRERA

BBRERA

DORIA

VETRO

Doria glass collection is realized with an **extra-clear tempered** glass top, 10 mm thick, retrolacquered in 5 colours: **extra-white, mocha, dark red, ecrù and black**, with glossy flush ground edges and rounded edges.

The glass tops are attached to the metal frame thanks to stainless steel spacers with a diameter of 30 mm. and height of mm. 15, glued to the glass top. Appropriate head caps mask the anchoring of the beams to the metal leg. The legs are made of pickled **tubular metal with rectangular section 70x20 mm.** and a thickness of 2 mm, laser cut and perforated.

The metal **beams have a “C” section** that gives them the necessary flexural strength. They are made of pickled sheet metal P11 2 mm thick, the cutting and processing are carried out by punching and subsequent press-folding.

All metal parts are available in **white** finish with a smooth matt finish, or in **bonderized grey or chrome finish**. On demand, legs are available in **5 different RAL colours**, or on RAL colour at the customer's request with plastic inserts in grey, white or black. The gland marsupes can be hooked to the fixed beams and can also be mounted on desk tops already assembled to the metal structure.

WORKSPACES

DORIA

MODULARITY COWORKING DESIGN

Worktops are made of melamine enamelled wooden conglomerate **18 mm thick**, with a low formaldehyde content. They are available in **white, lightly veined, light oak or dove-grey** solid finishes, with coloured ABS edge. The three standard finishes are available in rapid delivery.

On demand, both desks and other furnishing elements (filing cabinets, bookcase doors, etc.) can be produced in a further 25 finishes, according to the “**Doria Multicolour**” colour chart, among which 9 finishes are made with coloured edges, while the remaining ones are made with aluminium coloured ABS edge.

Connecting desks, long shelves and meeting tables complete the series of horizontal supports.

The structure consists of a pair of under-storey beams and a pair of “bridge” terminal legs.

The legs are made of pickled **tubular metal with rectangular section 70×20 mm. and a thickness of 2 mm**, laser cut and perforated. In addition to single legs and **shared legs for multiple workstations**, the system also includes a series of asymmetric legs that allow the use of load-bearing filing cabinets.

Adjustable ground adjustable feet complete the metal legs. The metal **beams have a “C” section** that gives them the necessary flexural strength. They are made of pickled sheet metal P11 2 mm thick, the cutting and processing are carried out by punching and subsequent press-folding.

All metal parts are available in white finish with a smooth matt finish, or in bonderized grey or chrome finish.

On demand, legs are available in **5 different RAL colours**, or on RAL colour at the customer’s request with plastic inserts in grey, white or black. The cable tray can be hooked to the fixed beams and can also be mounted on desk tops already assembled to the metal structure.

In addition to the classic bookcases, there are cabinets that can be attached to the desks, and that act as a **side leg or partition between bench stations**. Specifically, the Doria line has low desk side cabinets (height desk), medium (h. 121.4 cm), with front drawer hanging folder holder (h. 121.4 cm) or with load-bearing filing cabinet (height desk).

POP

CUSTOMIZE YOUR DESK

Doria “POP” is the choice to customize surfaces (both horizontal and vertical) of the Doria line elements. This choice is given by the **application of a specific film**, that can be realized in one color or with a drawing, a writing, an image or a picture, a company logo, **completely by Client choice**.

Technically, there are two different applications: the first with the custom drawing and the second with a transparent film, with no-scratch features, to protect the first film.

The process is reversible: films can be removed and changed in any time.

Doria Pop can be applied both to **melamine and glass tops**, and the result will be esthetically different. Glass top film can be applied on or under top, while melamine top film is applied only on desk-top, and includes also edge film.

DELTA

Worktops are made of melamine enamelled wooden conglomerate **18 mm thick**, with a low formaldehyde content. They are available in **white, lightly veined, light oak or dove-grey** solid finishes, with coloured ABS edge. The three standard finishes are available in rapid delivery.

On demand, both desks and other furnishing elements (filing cabinets, bookcase doors, etc.) can be produced in a further 25 finishes, according to the “**Doria Multicolour**” colour chart, among which 9 finishes are made with coloured edges, while the remaining ones are made with aluminium coloured ABS edge.

The structure of the Doria Delta line consists of a pair of under-plan beams and a pair of “easel” terminal legs.

The legs are made of **pickled metal tubular metal with rectangular section 70×20 mm.** and a thickness of 2 mm, laser cut and perforated. The assortment includes, in addition to the single legs per desk and long desk, the shared legs that allow the assembly of the double opposing positions.

Adjustable ground feet complete the metal legs.

The metal **beams have a “C” section** that gives them the necessary flexural strength. They are made of pickled sheet metal P11 2 mm thick, the cutting and processing are carried out by punching and subsequent press-folding.

All metal parts are available in **white Ral 9003** finish with a smooth matt finish, **or in bonderized grey or chrome finish.**

On demand, legs are available in **5 different RAL colours**, or on RAL colour at the customer’s request with plastic inserts in grey, white or black. The cable gland can be hooked to the fixed beams and can also be mounted on desk tops already assembled to the metal structure.

DELTA

RING

The worktops are made of melamine enamelled wooden conglomerate **18 mm thick**, with a low formaldehyde content. They are available in **white, lightly veined, light oak or dove-grey** solid finishes, with coloured ABS edge.

On demand, both desks and other furnishing elements (filing cabinets, bookcase doors, etc.) can be produced in a further 25 finishes, according to the “**Doria Multicolour**” colour chart, among which 9 finishes are made with coloured edges, while the remaining ones are made with aluminium coloured ABS edge.

Tops are also available in **back lacquered glass**, and are manufactured with extra-clear tempered glass of 10 mm thickness back-lacquered in the colours white, ecru', moka, dark red and black.

The leg is made of pickled **tubular metal with rectangular section 70x20 mm**. and a thickness of 2 mm, laser cut and perforated. The floor adjustment feet are made of black plastic with a diameter of 60 mm. The metal beams under the board have a “C” section, which guarantees them the necessary bending resistance, shaped with fixing supports also on the underside.

All metal parts are available in **white finish**, matt smooth effect, or **bonderized grey with a glossy effect**.

SHARED ACCESSORIES

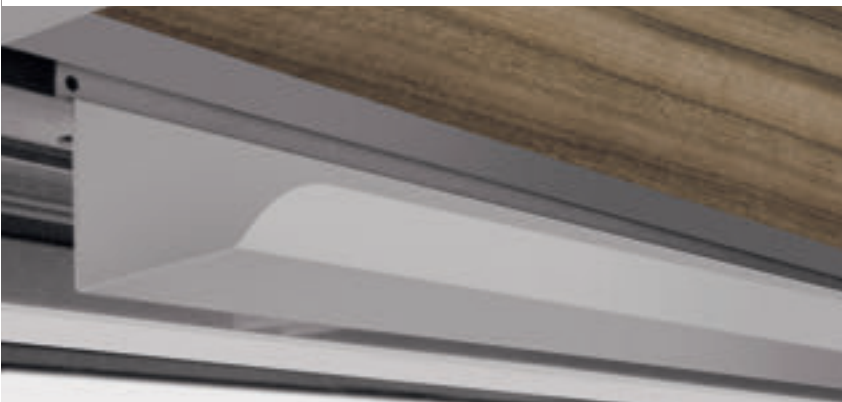

DORIA, DELTA & RING LINES

The double and opposing workstations can share some accessories, inserted in a specific central trail, that is fixed to the beams of the frame. The available accessories are: **vertical screens** in melamine, or made in **methacrylate**, **pantograph lamp**, **monitor holder and shelf**.

The others Doria and Delta **accessories** are: understorey cable tray, suspended metal computer rack, wooden or soundproof screen in various sizes, wooden modesty panel in the same finish as the desk top, cable gland cap/top access, cable gland vertebra.

Metallic **cable tray** are applied under the top and connected to the beams: in this way, it's easy to accommodate multi-sockets.

BOOKCASE AND CABINET

DORIA, DELTA & RING COLLECTIONS

Bookcases are made with a structure in **white melamine**, with a depth of 34.8 cm and two different widths (single or double sash) equal to 45 or 90 cm. Cabinets can be low (h 83 cm), medium (h 121.4 cm) or high (201.4 cm), to which must be added the height of the finishing top (optional) of 1.8 cm.

The back is manufactured in 18 mm thick melamine thickness, in the following colours: **white veined, light oak or dove-grey**, with ABS 2 mm edges. Doors and tops are made in melamine 18 mm thick and also available in white veined, light oak or dove-grey.

The handles are available in white, aluminium or chrome plated, combined to the metal legs of the desks.

Bookcases can be supplied with or without **finishing shoulders**. **Glass doors**

with anodised natural aluminium frame are available with lock, tempered glass 4 mm thick transparent or satinated. Doors with back lacquered or furred glass in colour are available on request.

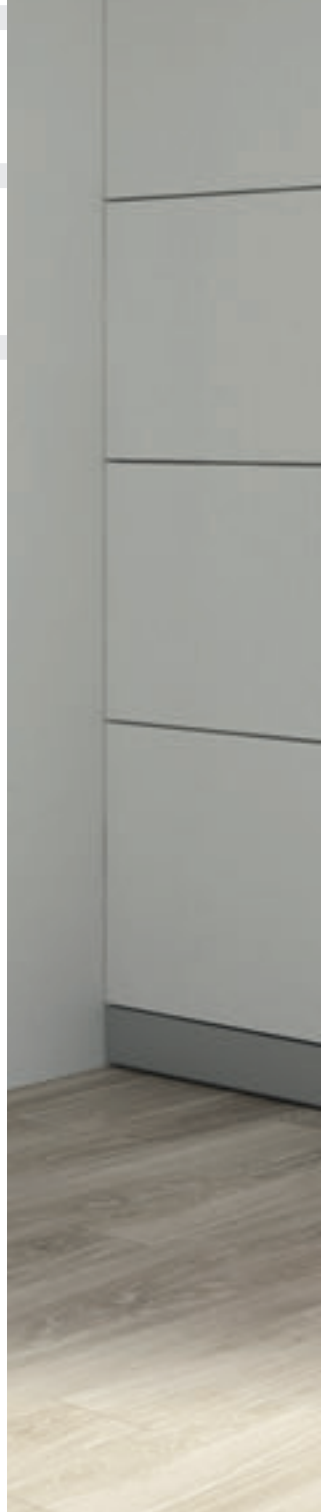

The main feature of the cabinets is the choice **to assembly the doors or the backs indifferently on the two opposite sides** of the frame; so that the compositions can be placed in the middle of the room, with the choice to decide at the moment in which side the doors has to open.

DORIA CUBE

DORIA CUBE cabinet is a modular box composed of **square compartments each measuring 39 x 39 cm**, arranged in columns of 4 compartments. Doria Cube compartments can be open, or equipped with a door leaf with an **opening system push-up**.

The doors are available in white, light oak, dove-grey, in 26 finishes of **Multicolour chart** or filmable with drawing supplied by the customer. A specific application of Doria Cube is **CUBE LOVE**, realized with **peeled doors** with contrasting black and white hearts, like the **famous POP** work by the artist Robert Indiana.

NEW ROSSANA

Worktops are realized with scratch-resistant melamine wood conglomerate, thickness mm. 30, in solid **grey finish and birch veined**.

All tops are edged with ABS 30/10 with bevelled profile on all sides, in the same colour of the worktop.

On demand, desks and other furnishing elements (filing cabinets, bookcase doors, etc.) can be realized in 26 additional finishes, according to the colour chart "**Multicolour**".

New Rossana has two kind of frame: the **panelled one and the metallic one**. Panel frame is realized with two melamine side legs and one melamine modesty panel. Metallic frame, named "GP", is a system made up of a central, cablable and wired beam, connected to two side legs, which can also be wired, with the form of a overturn "T".

The side legs are closed and finished with **covers**, which can be unhooked thanks to a snap system, to keep any cables covered and hidden inside the structure.

The entire metal structure is made of aluminium or with the finish, painted with epoxy powders.

WE WORK

NEW ROSSANA

EASY-UP

WELLNESS IN YOUR WORKPLACE

EASY-UP IS AN **ADJUSTABLE AND MOTORIZED FRAME**, MARKED BY A SIMPLE AND ERGONOMIC.

It's made up of two vertical telescopic legs, composed by a fixed part, and an elevating part, allowing an **elevation from 68 cm to 118 cm**, letting the operator to work standing. The frame, realized in metallic white colour, is suitable with tops with a length L 120 to L 180 cm.

The frame has a couple of motors driven by the user through a remote control under the worktop, with a speed of 35 mm/second.

As for the tops, they can be used all the ones of the collection Doria, Delta, Ring and New Rossana, choosing from the different colour chart **and supporting the both top** with a deep of 18 or 30 mm.

SKY-UP

PUSH & MANUAL

SKY-UP IS AN **ADJUSTABLE FRAME**, AVAILABLE IN TWO DIFFERENT KIND: **MOTORIZED OR MANUAL**, BOTH AVAILABLE IN ALUMINUM COLOUR RAL 9006.

Both kind of frame are made up of two vertical telescopic legs, composed by a fixed part, and an elevating part, allowing an **elevation from 68 cm to 113 cm**, letting the operator to work standing. The frame is suitable with tops with a length L 120 to L 180 cm and a depth of 80 cm.

The motorized frame has a motor driven by the user through a remote control under the worktop, with a speed of 15 mm/second. The manual frame has a crank located underneath the table.

As for the tops, they can be used all the ones of the collection Doria, Delta, Ring and New Rossana, choosing from the different colour chart **and supporting the both top** with a deep of 18 or 30 mm.

CABINETS

METALLIC

CABINETS

Cabinets are realized with folded steel sheets mm 8/10. Each cabinet frame is made of a basement and a top, both hooked on the short sides to cabinets sides.

Sides are realized with folded steel sheets mm 8/10 and are strengthened in the hooked parts.

Back is realized with only one steel sheet, except for cm 150 and cm 180 cabinets, for which is realized with two panels. In both situations backs are realized so that hooking holes are reaching from the inside of the cabinet or externally.

All cabinets are equipped with adjustable shelves, provided for suspended files storage. Doors can be sliding, hinged, realized in steel, glass or mesh.

Available depths: 45 or 60 cm.

METALLIC CABINETS

DAMPERS

Dampers cabinet are easily assembled with hooked mechanism. They are realized with a basement with skirting board (6 cm height), a top, and sides and back produced with folded steel sheets 8/10 mm.

Closing system is realized with dampers, in plastic material, that slide on apposite binaries. Shelves are adjustable and doors are equipped with closing key YALE type.

METALLIC CABINETS

EASYSLIM

Easyslim is an advanced filing system able to satisfy in a new and versatile way, the need of each working area.

The metal structure with thin edge gives to the Easyslim products a modern and rigorous line; it reduces considerably the encumbrance of cabinets, optimising the space and increasing the content capacity. The range of solutions for EasySlim filing system includes filing cabinet with 2 or 3 drawers. The structure with thin edge and an aluminium angular profile, gives to this product an elegant and refined look. The metal and anthracite finishings guarantee the perfect integration of the filing cabinets in every working area.

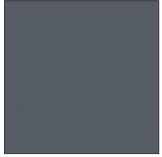

Easyslim filing cabinets represent a new way of interpreting the filing furniture thanks to their essential line, the reduced encumbrance of the structure, the accuracy on the selection of innovative finishings.

PARTITION WALL SYSTEMS

AQUARIUS

Aquarius is a system of single-glass or double-glass glass walls in the Aquarius Duo version, with aluminium perimeter profiles.

Inside for perimeter profiles there are levellers for glazing and safety anti-unlocking profiles.

Glasses are **laminated 5+5**, or custom **laminated 6+6**, with PVC seals between glass and glass.

The **doors** can be supplied with three types of sash: blind, framed or in glass, with two types of movement: door leaf or sliding in two heights: standard with H 210 cm. or H 260 cm. high: the combination of these parameters allows to offer a very wide range of doors. For further enquiries there is the possibility of tailor-made components.

Although thinner than 3 cm, the wall is stable thanks to the fact that it is fixed to the existing wall structure along the entire perimeter.

It is possible to create integrated dividers, moved by an alternation of full and empty volumes, combining the **Aquarius** glass wall with the **Gemini** wall.

The double glazing system makes it possible to create dividers with high soundproofing values.

AQUARIUS DUO

GEMINI

Gemini is a storage wall: a combination of a partition, **soundproofed** and fitted with doors, and at the same time a very large shelf cupboard.

The wall is available in modules of **50** or **100** cm, **270** or **300** cm high, **43** cm thick; the system provides side and top panels to achieve a complete division of the offices. The **interior** can be equipped with wooden shelves, the thickness of which is 3 cm. prevents deformation even with heavy loads, or with shelves in painted sheet metal, with filing cabinets or with frames.

The **connecting doors** between the equipped walls can be blind, framed or glazed, with swinging or sliding movement and height H210 cm.

GEMINI wall system is easily adaptable to any room where a particular wall square or levelling of the floor is not required; in fact, adjustable feet, horizontal and vertical buffer strips can conceal any imperfection of the room.

It also allows the passage of electrical, computer, telephone cables, through the technical compartment module, e. g. electrical sockets at a height of 20 cm, or switches next to door panels, with special housings without compromising the external appearance.

GLASS DOORS

AVAILABLE IN DIFFERENT COLORS

TAURUS

Taurus is a partition made with an internal load-bearing structure, consisting of exposed glass panels or frames.

The **modules** are in cm. 50, cm. 100, cm. 150 or cm. 200.

Taurus is a **double** wall, so the internal structure is fully convertible.

The **glazed panels** are available in three profiles: double glass with standard profile, double glass with thin profile, or single glass.

Glasses are 3+3 laminated, to be chosen in transparent or etched finish, 4+4 safety glass (greater noise reduction) and 6 mm tempered 4+4 safety glass can be supplied on demand.

The choice of **doors** is decidedly wide, thanks to the combination of three sash types: blind, framed or glass, with two types of movement: door leaf or sliding and two heights: standard 210 cm. or 260 cm. high.

The **finishes** can be combined with all operative production furnishing lines.

The 40 mm thick stone wool **insulation** is inserted inside the wall. density 40kg/mc.

The peculiarity of this wall is the hidden structure, so the wall will present itself with a uniform appearance of the chosen cladding.

Taurus wall is designed to accommodate **screenball panels: sound absorbing**, elegant and acoustically efficient; suitable when the use of environments requires the optimisation of acoustics.

Modularity is provided both with vertically positioned panels or glazing, as well as with horizontal panels, both blind and glazed.

ACOUSTIC SYSTEMS

COMFORT Screen

COMFORT Screen is a sound absorbing panel created for desk application. The 40 and 60 cm height, which can also be combined, allows to define different degrees of interrelation and impedance, the element of the latter, which is of paramount importance, especially in the design of large open spaces with team-space collaboration forms.

Just because of its aesthetic value, **COMFORT Screen** is also strongly demanded in its Vertical and Horizontal Baffle version to tone and correct sound waves at the same time, always twisting the eye to a harmonious and appealing design result.

COMFORT Grid

COMFORT Grid is sound-absorbing panel with a ribbed pattern. This panel is perfect to add a colorful touch to walls and ceilings.

Hanging from the ceiling, the panel creates a pleasant and special layout, able to exploit not only the sound-absorbing performance but also to influence the refraction of sound waves.

COMFORT Wall

COMFORT Wall is a sound absorbing thermoformed panel.

The ideal solution for openspace, **COMFORT Wall** is the perfect element of a modular system that allows you to create workstations and separators that are 3D-looking, pleasing to the eye and highly performing.

It is extremely light and suitable for any type of environment where you want to achieve acoustic comfort.

COMFORT Wall Flex

COMFORT Wall Flex version allows to create separated spaces with a curve aspect, in a totally innovative 360 degree flexibility, with the aim of improving the acoustic comfort of work and relaxation environments.

Thanks to its non-constant linear structure, the panel reacts dynamically to the absorption of sound, as well as allowing space to be created at maximum freedom.

COMFORT Panel

Square / Rectangle / Circle

COMFORT panel is a modular acoustic element available in different shapes: *Square, Rectangle* and *Circle*. It can be applied directly to the wall and ceiling using *T grid suspension system* or *glue*.

It perfectly combines aesthetic and decorative qualities with a high sound absorption performances.

COMFORT Panel Double

COMFORT Panel Double is an acoustic element for sound absorption with a double absorbing surface. The panel is available in different shapes: *Square*, *Rectangle* and *Circle*. It can be installed through a ceiling suspension system.

COMFORT Panel Double is available in various colors.

BRERAKUSTIK

BRERAKUSTIK is an elegant acoustic absorption system for walls and ceilings made of wooden interlocking modular boards.

BRERAKUSTIK is available with a perforated, microperforated or grooved surface covering a MDF board and polyester fiber mat to apply in the cavity to obtain excellent acoustic absorption performances.

The wide range of finishes includes wood veneers, melamine, laminates and others upon request.

COMFORT Round

COMFORT Round is a colorful and lightweight sound-absorbing panel.

It can be applied into *metallic T grid system* or directly on wall and ceiling with *tear tape*.

The various colors and materials finishes allow you to find the most suitable panel for your space.

COMFORT Callbox

COMFORT Callbox is an high sound absorption product, specifically designed to enhance acoustic comfort during telephone calls, especially in large and / or open spaces. It can be acoustically refined inside with acoustic panels.

The custom process allows customers to choose size and finish according to the requirements.

COMFORT Cube

COMFORT Cube is a sound absorption element that allow to play in a nice colourful way with aesthetics and technical scope.

COMFORT Cube has an high absorption coefficient (**AEQ**) thanks to the six faces that all helps to reduce the reverberation of the room inside where installed. Available in different dimensions according to the ceiling height.

COMFORT Pouf

COMFORT Pouf is a furniture with *High Tech Foam*, designed not only for physical comfort but also for acoustic well-being.

Available in various colors.
