CARTESIO

CARTESIO

Struttura modulare metallica dalla linea leggera, sobria ed elegante, pensata per soddisfare le esigenze dettate dai nuovi stili di vita e dalle nuove modalità di lavoro.

Modular metal structure with a light, sober and elegant line, designed to meet the needs dictated by new lifestyles and new ways of working.

Structure modulaire métallique légère, propre et élégante, conçue pour répondre aux besoins créés par les nouveaux modes de vie et de travail.

SPECIFICHE PRODOTTO
PRODUCT SPECIFICATIONS
SPÉCIFICATIONS PRODUIT

CARTESIO

Cartesio si compone di un reticolo metallico in cui si inseriscono box lockers, box guardaroba, ripiani fissi, cuscini seduta e vaschette porta oggetti, che possono all'occorrenza fungere da fioriere, diventando quindi un mobile molto decorativo, ma al contempo funzionale.

Esprime al meglio il suo concept progettuale se utilizzato come elemento divisorio centro stanza, per separare gli ambienti open-space e creare privacy tra le postazioni di lavoro, ma trova impiego anche accostato alla parete. Si presenta in tre altezze che vanno dalla seduta, alla libreria; la lunghezza è invece dettata dalla ripetizione modulare degli elementi che lo compongono.

Il reticolo metallico è strutturalmente costituito da fianchi iniziali, oppure centrali e da coppie di traversi.

Le coppie di traversi hanno funzionalità specifica a seconda della loro ubicazione e funzione all'interno della struttura che si intende allestire e non sono intercambiabili tra loro.

Sia i fianchi metallici che le coppie di traversi sono realizzati con scatolato metallico decapato avente sezione 20x20 mm e si rendono solidali tra loro mediante viti a testa svasata esagono incassato M4x14.

I fianchi sono disponibili con profondità 46 cm nelle tre altezze H1, H3 e H5, mentre per la versione guardaroba

hanno profondità pari a 60 cm.

Tutti i tipi di fianchi sono dotati di piedini regolabili per il livellamento a pavimento.

I box locker, i box guardaroba, i ripiani fissi e le vaschette porta-oggetti sono realizzati in conglomerato ligneo nobilitato melaminico spessore 18 mm.

Tutti i tipi di box sono dotati di anta in metallo, con spessore pari a 10 mm, maniglia ad incasso e serratura.

Per i box guardaroba è previsto il relativo tubo appendiabiti.

I box si fissano utilizzando le apposite viti a testa svasata esagono incassato M4x25.

I ripiani fissi si rendono solidali alla struttura esercitando una leggera pressione, in modo che scattino negli appositi alloggiamenti le molle di tenuta della coppia di traversi per ripiano.

Vaschette e supporti seduta si inseriscono sulla struttura semplicemente ad incastro.

Tutte le parti metalliche sono verniciate a polveri epossidiche senza metalli pesanti e sono disponibili nei colori bianco opaco e antracite opaco.

I box in melaminico hanno finitura Bianco Moon, mentre le vaschette porta-oggetti sono in finitura Rovere Margo.

Il colore del rivestimento dei supporti seduta è a discrezione del cliente, da scegliere nella cartella rivestimenti Mirage.

Cartesio consists of a metal grid in which lockers, wardrobe boxes, fixed shelves, seat cushions and storage trays are inserted, which may also become planters if necessary, thus becoming a very decorative piece of furniture, but also functional at the same time.

It expresses in the best way its design concept when used as a room divider, to separate open space environments and create privacy between workstations, but it can also be used next to the wall. It comes in three heights ranging from the seat to the bookcase; the length is instead dictated by the modular repetition of the elements that constitute it.

The metal grid is structurally made up of initial or central sides and pairs of crosspieces.

The pairs of crosspieces have a specific function depending on their position and function within the structure which is meant to be built and they are not interchangeable with each other.

Both the metal sides and the pairs of beams are made of pickled metal box with section 20x20 mm and are joined together by means of M4x14 hexagonal countersunk screws.

The sides are available with a depth of 46 cm in the three heights H1, H3 and H5, while for the wardrobe

version they are 60 cm deep.

All the types of sides are equipped with adjustable feet for floor leveling. Locker boxes, wardrobe boxes, fixed shelves and storage trays are made of melamine-faced wood conglomerate 18 mm thick.

All the types of boxes are equipped with a metal door, 10 mm thick, with recessed handle and lock.

The wardrobe boxes are provided with a clothes hanger tube.

The boxes are fixed using the appropriate M4x25 hexagonal countersunk head screws.

The fixed shelves are made integral with the structure by exerting light pressure so that they click into the appropriate slots, the holding springs of the pair of crosspieces per shelf.

The trays and seat supports are simply inserted into the structure with interlocking joints.

All the metal parts are coated with epoxy powders without heavy metals and are available in matt white and matt anthracite.

The melamine boxes are available in Bianco Moon finish, while the storage trays have a Oak Margo finish.

The color of the upholstery of the seat supports is at the customer's discretion and can be chosen from the Mirage upholstery chart.

Cartesio se compose d'une grille métallique dans laquelle sont insérés des box lockers, des boîtes d'arrangement, des étagères fixes, des coussins de siège et des casiers de rangement - qui peuvent également devenir des jardinières si nécessaire - devenant ainsi un meuble décoratif et fonctionnel à la fois.

Il exprime mieux son concept de design lorsqu'il est utilisé comme élément de séparation au centre de la pièce, pour séparer les espaces ouverts et créer une intimité entre les postes de travail, mais peut également être utilisé à côté du mur. Il est disponible en trois hauteurs, allant du siège à l'armoire; et la longueur est déterminée par la répétition modulaire des éléments qui le composent.

La structure métallique est composée de côtés d'extrémité ou centraux et de paires de traverses.

Les paires de traverses ont des fonctions spécifiques qui dépendent de leur emplacement dans la structure à monter et ne sont pas interchangeables.

Les côtés métalliques, ainsi que les paires de traverses sont réalisées en caisson métallique découpé de section 20 x 20 mm et s'unissent à l'aide de vis à tête fraisée à six pans creux, M4x14.

Les côtés sont disponibles avec une profondeur de 46 cm dans les trois hauteurs H1, H3 et H5, tandis que pour la version

armoire, ils ont une profondeur de 60 cm. Tous les côtés sont équipés de pieds de nivellement réglables.

Les box lockers, les casiers vestiaires, les étagères fixes et les boîtes de rangement sont en aggloméré de bois mélaminé d'épaisseur 18 mm.

Tous les types de boîtes sont équipés d'une porte métallique d'une épaisseur de 10 mm, avec poignée encastrée et serrure. Le tube de cintre est prévu pour les casiers vestiaires.

Les boîtes sont fixées à l'aide des vis à tête fraisée à six pans creux M4x25 appropriées.

Les étagères fixes s'unissent à la structure en exerçant une légère pression pour que les ressorts d'étanchéité de la paire de traverses s'encliquettent dans les logements appropriés.

Les plateaux et supports d'assise s'insèrent sur la structure par simple emboîtement.

Toutes les parties métalliques sont vernies avec poudres époxy sans métaux lourds et sont disponibles dans les couleurs blanc mat et anthracite mat. Les boîtes en mélamine ont une finition Bianco Moon, tandis que les casiers de rangement ont une finition Rovere Margo.

La couleur du revêtement des supports de siège est selon le choix du client et peut être sélectionnée parmi la gamme des revêtements Mirage.

MANUTENZIONE E PULIZIA

MAINTENANCE AND CLEANING

ENTRETIEN ET NETTOYAGE

USO E MANUTENZIONE

Per una manutenzione ottimale dei prodotti e per mantenere inalterate le caratteristiche dei materiali con cui sono realizzati, sono necessarie alcune semplici attenzioni.

I LEGNI

Pulizia: pulire con un panno umido e soffice imbevuto in acqua tiepida. Asciugare sempre dopo la pulizia.

Rimuovere subito eventuali sostanze liquide o altri residui per evitare l'assorbimento.

Uso: le superfici in legno, essendo un materiale naturale, potrebbero, nel tempo, subire alterazioni di colore con l'utilizzo e con l'esposizione alla luce.

I METALLI

Pulizia: sia le superfici metalliche in acciaio o in alluminio, che le superfici verniciate, devono essere pulite con un panno umido e soffice imbevuto in acqua calda.

Per le macchie più ostinate è possibile diluire in acqua del sapone neutro liquido, con moderazione. Asciugare sempre dopo la pulizia con un panno morbido.

Non usare creme e paste per pulire l'acciaio, non usare cloro, non usare candeggina o altri detergenti aggressivi.

Sconsigliato usare paste, pagliette e spugne abrasive che possono graffiare le superfici metalliche.

Uso: fare attenzione alle macchie di alimenti come caffè, cola, succhi di frutta che possono lasciare macchie indelebili sulle superfici.

USE AND MAINTENANCE

For optimal maintenance of the products and to preserve the characteristics of the materials they are made of, some simple care is required.

WOOD

Cleaning: wipe with a soft, damp cloth soaked in lukewarm water. Always dry after cleaning.

Immediately remove any liquid substances or other residues to prevent absorption.

Usage: wooden surfaces, being a natural material, may undergo color alterations over time due to usage and exposure to light.

METALS

Cleaning: both steel or aluminum metal surfaces, as well as painted surfaces, should be cleaned with a soft, damp cloth soaked in warm water.

For stubborn stains, a mild liquid soap diluted in water can be used sparingly.

Always dry after cleaning with a soft cloth.

Do not use creams or pastes to clean steel, do not use chlorine, bleach, or other aggressive detergents.

Avoid using abrasive pastes, pads, or sponges that may scratch the metal surfaces.

Usage: pay attention to food stains such as coffee, cola, fruit juices that can leave permanent marks on the surfaces.

UTILISATION ET ENTRETIEN

Pour un entretien optimal des produits et pour préserver les caractéristiques des matériaux dont ils sont faits, quelques simples précautions sont nécessaires.

BOIS

Nettoyage : essuyer avec un chiffon doux et humide imbibé d'eau tiède. Toujours sécher après le nettoyage. Retirer immédiatement toute substance liquide ou autre résidu pour éviter l'absorption.

Utilisation : les surfaces en bois, faites d'un matériau naturel, peuvent subir des altérations de couleur avec le temps en raison de l'utilisation et de l'exposition à la lumière.

MÉTAUX

Nettoyage : les surfaces métalliques en acier ou en aluminium, ainsi que les surfaces peintes, doivent être nettoyées avec un chiffon doux et humide imbibé d'eau chaude.

Pour les taches tenaces, un savon liquide doux dilué dans l'eau peut être utilisé avec modération.

Toujours sécher après le nettoyage avec un chiffon doux.

Ne pas utiliser de crèmes pour nettoyer l'acier, ne pas utiliser de chlore, d'eau de javel ou d'autres détergents agressifs.

Évitez d'utiliser des crèmes, des tampons ou des éponges abrasifs qui pourraient rayer les surfaces métalliques.

Utilisation : faites attention aux taches alimentaires telles que le café, le coca, les jus de fruits qui peuvent laisser des marques permanentes sur les surfaces.
